

Guess the animal

My favourite animal

Imagine a bird that lives in warm, rainy forests! This bird is very colorful. It has a big, bright beak that looks like it's made of a rainbow. The beak can be yellow, orange, red, or even green!

Its body is mostly black, but it might have a white or yellow throat. It has short wings and a long tail. It loves to eat fruit, like berries and bananas.

This bird lives in trees and makes a funny, croaking sound. It's often seen hopping from branch to branch, showing off its beautiful, large beak.
