Noemi Dalmau - Escola Lavinia - Barcelona, Spain

Hello dear partners!
My name is Noemi and I work as a primary and pre-primary teacher in a small school in Barcelona. I work part-time so I only teach English to P5, 5th and 6th grades.
I love my job and I like working in eTwinning projects. I am learning a lot with you all!
Thanks!

Hello everyone, I am an English teacher and my pupils are 6 graders this year. My school is Vladimir Nazor Primary School, Diklovo. It is situated in east Slavonia, a beautiful region of my country with lots of fields and woods around the city. My pupils and I enjoy working in different eTwinning projects, it is always a new challenge for us and this way we learn and communicate with other project partners, we use various digital tools and use English in an active way. In my free time I love taking long walks with my dog, taking photographs of nature, travelling with my friends and family members and reading.

Hello everyone, I am Gülname Kayhan from Mersin / Turkey. I am an English teacher at Şehit Sükrü Ünlü Secondary School. I have been teaching English for 12 years. It is my fourth year in eTwinning. Each year I feel a new excitement, because I believe that eTwinning brings in new cultures, language development, creativity, innovation, interdisciplinary harmony...etc.
Thanks to this project, we will explore the unknowns of space. We are very excited for the collaboration.

- Dear students, how can we create a spaceship? What items should it have? What rules should we follow to build it up?

Ask your Science, Technology, Mathematics, Art teachers for suggestions.

Ask your parents, friends, experts, too.

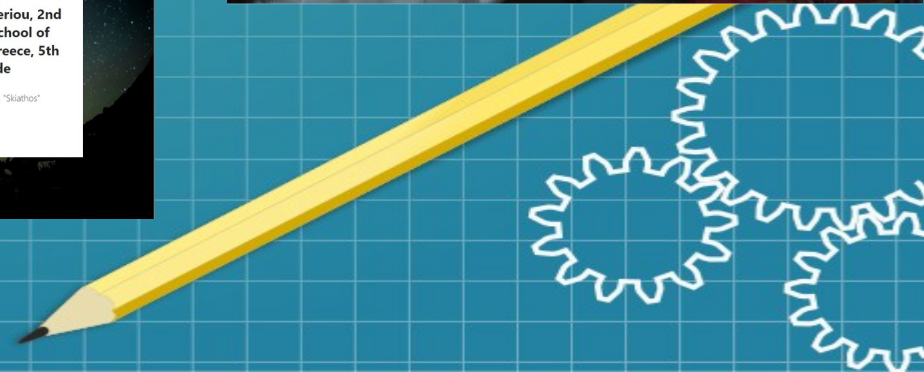

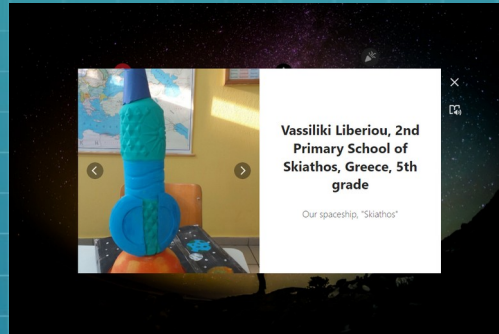

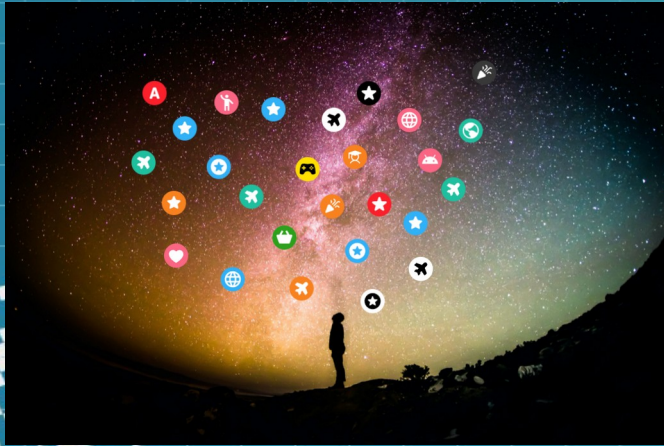

- Open a thread in the Forum and write what you learned about creating a good spaceship.

Then each school will follow the suggestions in order to make a great spaceship.

This is **Eco**. He lives on the mysterious planet Crescent. The aliens on this planet are very tall and skinny, they have rather long legs but short arms, big dark almond eyes and big ears but a small nose and very small mouth. They are pink ghostlike creatures. They wear strange head gears which help them get information from each other and from the Universe and keep in touch by sending different signals. They all have pets who also wear such head gears. They like to walk and spend time in nature.

IN THE CURRICULUM
The project involved many subjects such as Art, Foreign Languages, Technology, Social Studies, Science. The topic: a Journey to Space: was integrated in the school curriculum during the lessons.

They created a flag for Crescent. All the flags were collected in a common flag using a collage.
They wrote rules for the alien school: it is green, sustainable, inclusive.
They drew a partner's rule

FIRST COMMON WORK: We prepared the journey
Students created boarding cards to introduce themselves.
They looked for information about making a spaceship and they had a workshop with an expert about space materials.
They designed their spaceships and collected them on Thinglink.
They chose the name of the planet.
They had a logo contest.

COLLABORATION
We started creating a Kahoot game for students to play and learn e-safety in the classroom; a Forum in order to write our expectations and thoughts at the beginning of the project; a google document where we collected information about us, our schools, our websites.
We created a Facebook group and a Whatsapp group of the project.
We distributed the project tasks using a table where we wrote the pages which we were available to prepare.
We use Forums and we had online meetings with students and teachers.
