VENUS

# VENUS

## DESCRIPTION

Venus is the second planet from the Sun and is often called Earth's 'sister planet' due to its similar size and composition.

# VENUS

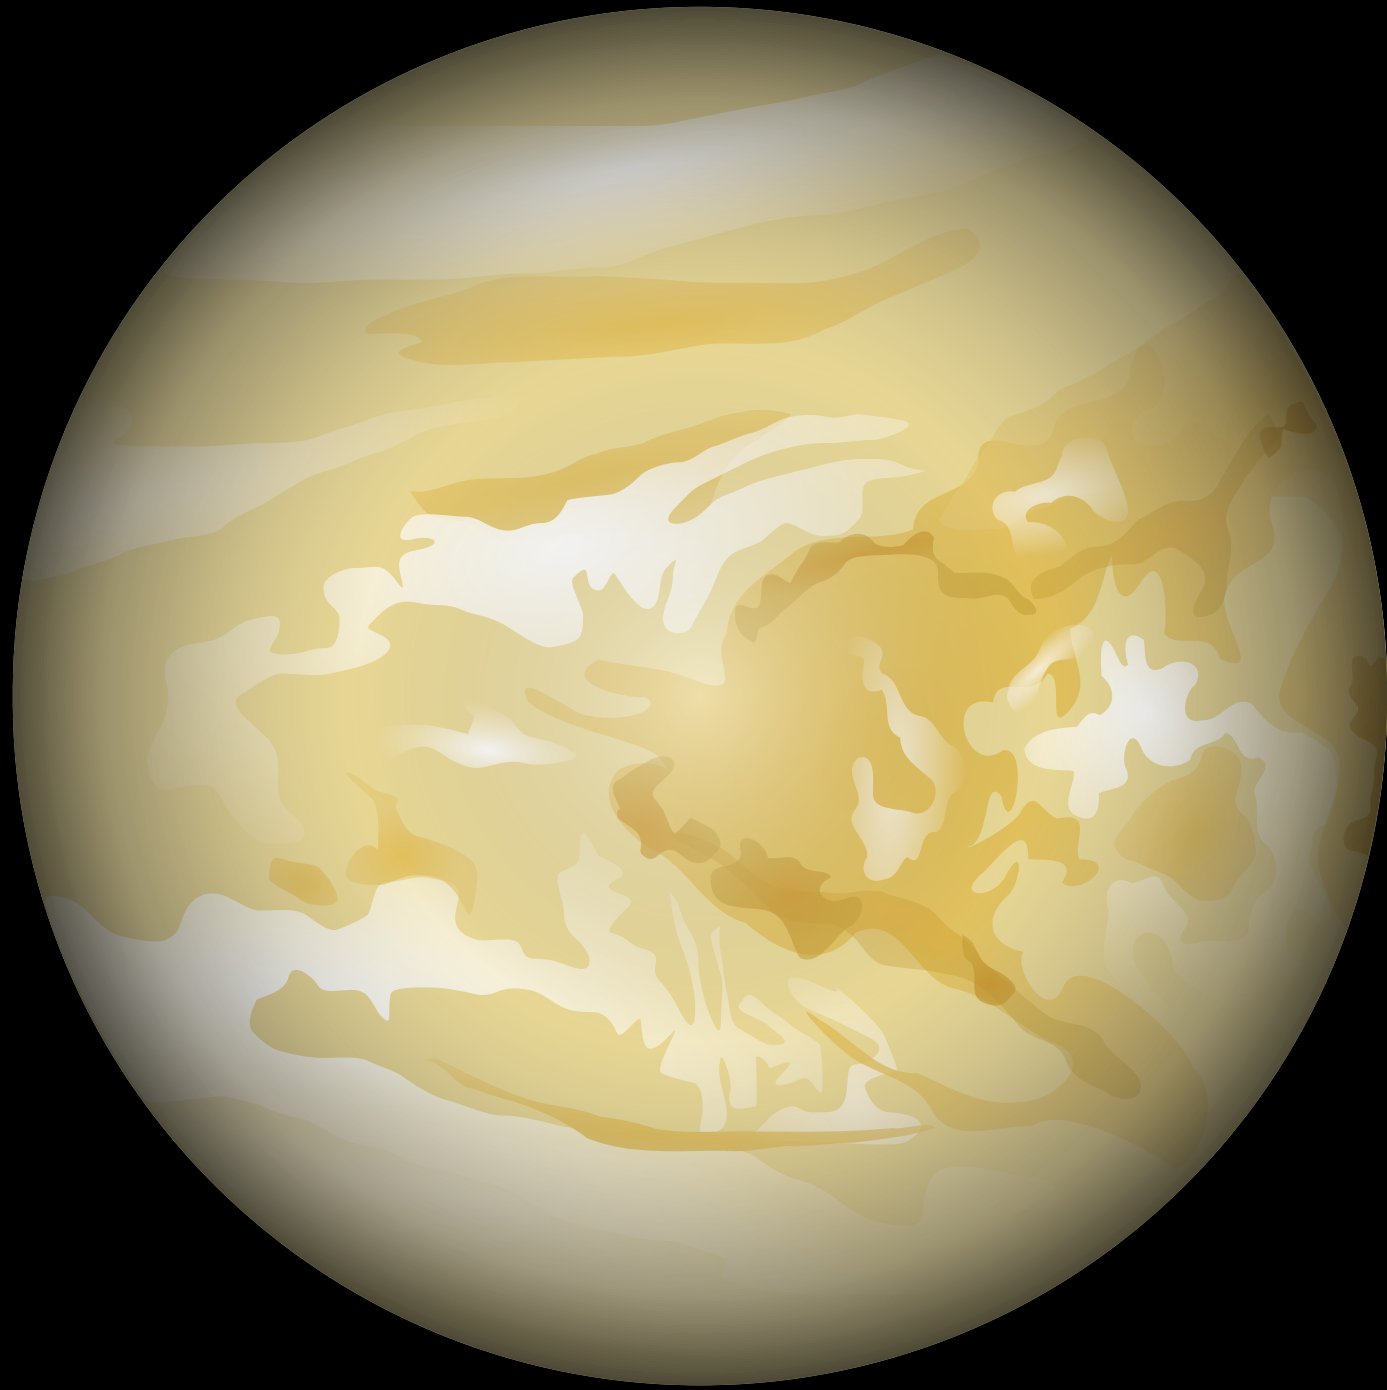

## DESCRIPTION

However, its thick atmosphere, composed mainly of carbon dioxide, traps heat, making it the hottest planet in the solar system with surface temperatures reaching over 460°C.

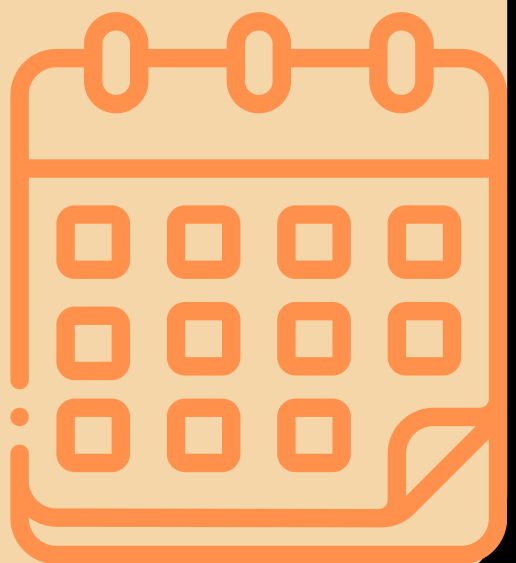

# VENUS

## DESCRIPTION

Venus has a slow rotation and takes 243 Earth days to complete one rotation.
